🙋‍♂️ Hello!

I'm an informatics engineer with extensive experience and proficiency in Android development. Through the years, I've acquired a deep understanding and practical know-how of crafting top-notch mobile applications that users love.

I'm well-versed in Java, with medium-high expertise in Kotlin. Whenever possible I implement clean architecture, SOLID principles, leveraging Android architecture components and design patterns to create dynamic and user-friendly apps that are maintainable and scalable.

Strong track record in leadership, having successfully led development teams and managed projects using traditional and agile methodologies.

If you're looking for a dedicated professional with a valuable skill set in mobile development, leadership and project management, I'm here to deliver. Let's team up to create exceptional Android apps that exceed your expectations.

💼 Tech Stack & Skills

High expertise on: Java, Android, Android Architecture Components.

Overall experience with: Kotlin, KotlinRX, Room, SQL, Retrofit, Jetpack Compose, Coroutines, RXJava, git, unit testing, UI testing, Rest API, Firebase, systrace/perfetto, gradle, maven, jfrog, generating and publishing apks/app bundles

---
