🧑🏻 Hello!

I'm an Informatics Engineer with extensive experience in Mobile Development. Through the years, I've helped companies develop their apps with the utmost commitment and care to detail.

A few years ago, I had the wonderful opportunity to transition to other roles that were more related to management, always aiming at being involved in a technical / decision-making position.

Currently, I'm working at Identy, helping to shape the future of biometrics and identity as a Solutions Engineering Manager.

👷 Experience:

@Identy March 2023 - Current

Senior Mobile Developer | Solutions Engineering Manager

Solution Engineering, Training and Consultancy to customers.
Devkit design and development to ease the integration of our SDKs.
Leading the development of demos and apps for the Sales and Product team.
Implementation Support and training to customers.

@Accelya April 2022 - March 2023

Project Manager | Scrum Master

Project Manager at Accelya Group, assigned to multinational projects using Agile and Traditional Methodologies/Frameworks (Scrum, Kanban and Waterfall). Direct communication with clients, facilitating cross-departmental collaboration, leading steering committee meetings with major stakeholders, providing agile coaching and assistance. Scrum Master of 4 development teams.

@Diusframi August 2020 - April 2022

Senior Mobile Developer

Senior Mobile Developer at Grupo Diusframi, leading the development of the company's internal mobile app portfolio. Total refactorization of the main internal mobile app, automating and optimizing a weekly process that previously took 1 hour and a half, down to one minute. Design and implementation of a new mobile app for the internal logistics of the company's warehouses.

@Smartmatic September 2019 – July 2020

Solutions Engineer

Solutions Engineer at Smartmatic, mostly Android development on Java. Involved in the solution design and development of apps and demos for international bids related to government and electoral solutions.

@BFC July 2018 – August 2019

Project Lead

Leading the development of an hybrid app using Ionic for the Online Banking department. Responsible for software development, maintenance, and analysis of software requirements at the Internet Banking department.

@Freelance April 2014 – July 2018

Mobile Developer

Mobile Developer **@Wegamo** building **Hola Doc**
Mobile Developer **@Koolsite** building **EasyFix**
QA tester **@Smartmatic**

👨‍🎓 **Education:**

Informatics Engineer @UCAB - Caracas, Venezuela (2019)

Specialization in Project Management @GWU – Remote (2020)

📄 **Certifications**

Project Management Professional Certification by Google (2022)

Professional Scrum Master I by Scrum.org (2022)

MIT's approach to Design Thinking by MIT (2019)
